## REVENUE DISTRICTS, TAX AREA CODE NUMBERS, AND DESCRIPTION OF PROPERTY

## REVENUE DISTRICTS

In the county there are cities, school and other taxing districts. Each district is created by law and has a name and definite boundaries. The districts for which the county officers assess property and collect taxes or assessments on the assessment roll are referred to as revenue districts. Each parcel of property is situated within more than one of these revenue districts and always is in some combination of such districts.

For the proper tax rates to be applied, it is necessary for property to be arranged in the assessment roll according to cities, elementary school and other revenue districts.

## TAX AREA CODE NUMBERS

For the purpose of simplicity and accuracy, a number is assigned to each different combination of revenue districts, such number being termed the "tax area code" number. The county is a revenue district in addition to those designated for each tax area.

The tax area code number is in two parts, the first part indicating the city or, for areas outside cities, the school district, and the second part, the various combinations of revenue districts within the respective city or school district.

Printed at the top right of each map page in this book are the code numbers of the tax areas in which the property on that page is located. The boundaries of each tax area, where the area covered by a map is in more than one tax area, are indicated on the respective map by distinctive lines.

The revenue districts for each tax area within this map book are indicated on a subsequent page.

## DESCRIPTION OF PROPERTY AND PARCEL SYSTEM

In this map book the legal description, whether it be by the federal system of surveys of township and range, section and fractional section, by reference to maps either recorded or otherwise legally provided, or by metes and bounds, is indicated on each respective map. Bearings, distances, subdivision names and other descriptive data are indicated when known and authentic.

A written description of each parcel of property, together with the ownership, the owner's address, if known, and the assessed value, is available from a companion record known as the master property record which is readily referred to by use of the parcel number.

## PARCEL NUMBERING SYSTEM

To provide an efficient and automatic file number for the indexing of records, for the filing of records, for cross reference of field and office records and for simplicity of description in the preparation of the assessment roll and other records, a parcel numbering system has been installed as a part of this map system. The parcel number consists of three parts, the first part indicating the map book number within the county; the second part, the map page number in the particular book and the block number on that page (if the area is divided into blocks), the first two digits indicating the page number and the third digit the block number; and the third part, the parcel number on the map page or within the block if there be one.

A parcel number, as for example 3-160-09, would mean book 3 of the assessor's maps, map page 16 (0 indicates no block) and parcel 9 on that page. A parcel number, as for example 3-163-05, would mean book 3 of the assessor's maps, block 163 (map 16, block 3) and parcel 5 within that block.

The map book and page number are indicated in the upper right-hand corner of each map. The block number, if there is a block, is shown within a circle or oval centrally located within the block, and the parcel number of each parcel is shown within a circle within the boundaries of the parcel. The boundary lines of each parcel are shown in solid lines and, should a parcel cross a solid line, connecting ties are indicated (———).

Adjoining page and book numbers are indicated in circles on the exterior boundaries of each respective map.

Cuts and divisions in parcels are indicated by colors, and a new parcel number is always assigned whenever the boundaries of a parcel are changed.

The areas covered by each map book in the county are indicated on a wall map in the assessor's office, entitled "Index to Map Books." The index map for this book is on the following page. Any recorded subdivisions within this map book and the pages on which they are shown, are indicated on the subdivision index which follows the index map.

The parcel numbering system was adopted by the county in conformity with the provisions of Section 327 of the Revenue and Taxation Code. It was officially adopted by the county by resolution No. \_\_\_\_\_ on \_\_\_\_\_ 19\_\_\_\_.

The maps constitute a permanent official record and a parcel number always indicates a specific parcel of property. If the boundaries of a parcel of property are changed a new parcel number is assigned to describe the changed parcel.
